Autodesk acquired Autodesk, Inc. in 2012. History AutoCAD Activation Code's original development started in the early 1970s at AutoDesk, Inc. (now Autodesk) and by 1977 its first release as a desktop application was introduced. AutoDesk purchased Authoring Services Inc. in 1979 and renamed it Autodesk, Inc. by 1981. AutoDesk was renamed to Autodesk in June 1992. Autodesk was the leading CAD application in the 1990s and the leading 2D and 3D CAD application globally. AutoCAD is the most widely used CAD application in the world with over 2.2 million registered users as of 2016. AutoCAD has been a leading CAD application for more than 40 years, and the product was named "CAD Product of the Year" in 1981. The user interface has undergone numerous revisions. Marketing The AutoCAD brand is owned by Autodesk. A marketing campaign emphasizing "design and delivery, not design alone", appears prominently on every version of AutoCAD since 2000. A particularly successful effort, as evidenced by the number of products and services AutoCAD has enabled, was its "assistive technology" program. This program included a suite of add-ons, such as the ACIS Memory Aid add-on, the ACIS-Lens add-on, and the Remote Access Tool, as well as other software tools and services, including a server software program for connecting users at remote sites. Autodesk has emphasized improved performance since 2009. The company claims that the new release (2017 version) of AutoCAD takes the same size of data as previous versions and outputs the same amount of data, but requires less memory and is considerably faster. Comparison of AutoCAD and older software (1992) Successful attempts to replace the existing brand include: Naming and branding issues In an interview with Autodesk on August 15, 2005, Bill Lowe explained the marketing reasons behind naming the product AutoCAD instead of AutoLISP: This is the reason it doesn't have an "L" in the name. The AutoCAD name was chosen because it meant to convey that AutoCAD was very powerful and could make design easy. It's the same reason AutoLISP didn't have an "L". AutoCAD is not LISP, even though it has LISP capabilities
