Microsoft Windows has been deeply integrated into various electronic appliances and is installed more often than ever. However, the conventional Microsoft Windows group is somewhat cumbersome. The group includes many folders:

C:Program Files = {F, S, R},

C:Program Files (x86) = {F, S, R},

C:Program Files (x86)\Common Files = {S, R}, C:Program Data = {F, S, R} and various other folders.

To open a file or to run an executable in these folders is not so simple. In addition, the folder structure is also not simple. So, if

you want to open a file or run an executable in one folder, you need to open each folder to find it. The first 5 files listed below are pre-installation of the tools launched by MicroLaunch. Now, to open or run these files will not cause problems.

Microsoft also provides support for
users with the "Table of Contents"
function in Windows. On the menu,

when you want to open a program, you need to first go to "Table of Contents" and then search for the program by clicking the "Windows" or "In-built". If you do not want to keep the "Table of Contents" function, it can be removed by following the steps below: 1. Click "
