GoGrabber Crack [Win/Mac]

------------------------------------ GoGrabber is a simple freeware utility for Windows which will take screenshots of the entire desktop, or a particular region of the screen, at periodic intervals. Screenshots can be saved to files, or directly to the clipboard. A built-in optical character recoginition system will remove any unwanted text and return it to the clipboard for pasting directly into any application. GoGrabber Features: ------------------------------------ 1. Scheduled tasking. GoGrabber can be configured to automatically take screenshots at defined intervals. 2. Ability to save the screenshots to files or directly copy them to the clipboard. 3. Ability to scale screenshots to several sizes. 4. Ability to remove any text from the screenshots using an optical character recoginition application. 5. Ability to easily tag the screenshots with words. 6. Ability to exclude regions of the screen from the screenshots. GoGrabber is a free utility and is distributed without charge either as shareware, or a free trial version. GoGrabber is a freeware utility that can be downloaded at www.anothertool.com. Thursday, March 19, 2014 Boilrinx is a built in antivirus program for Windows. It is available in the Windows 7 and 8.1 operating systems and is automatically updated with all security patches from Microsoft. Although Boilrinx is a built in antivirus program, we're still assuming that you don't want to have antivirus software cluttering up your screen. We're also assuming that you are on a home or small business network, and have the software installed on all your devices, including your mobile devices. Boilrinx is a multi-platform antivirus program. It works on Windows mobile phones, tablets, and PC's. Boilrinx should be installed on all your Windows mobile devices, assuming that you have a home or small business network. Wednesday, March 18, 2014 You can create a desktop shortcut for virtually any web page, including those hosted on your office, home, or small business network, or even on Facebook, Hotmail, or Yahoo. You can also create shortcuts for all the sites that you visit most frequently, or just those that you most commonly forget to bookmark. How it works: ------------------------- Click the Site, e.g. www.anothertool.com, right-click on the page and click Add to Favor

What's New In?

GoGrabber allows a windows user to easily take screenshots of their desktop, and also run the screenshot through a optical character recoginition application which extracts any embedded text which is later displayed to the user. * Program must be able to capture the entire screen and persist to the clipboard. * Able to run in the background * Scanning in progress shows in status bar GoGrabber is a windows utility that allows the user to take screenshots of their desktop. Also, by running the screenshot through an optical character recognition (OCR) application it extracts any embedded text which is then displayed to the user. GoGrabber lets you take screenshots of your desktop and turn them into OCR scans. Simply select the default screenshot mode from the Screenshot menu or start GoGrabber via the Start menu. Once the screenshot is taken, the image will be automatically saved to your desktop. Later GoGrabber will automatically open the image in a text processing application. GoGrabber is free software, Copyright (C) 2004-2008, John Sason. GoGrabber is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details. I use it to take screenshots at work since they don't allow keystroke logging or any other form of screen capture. One of our System Administrators started using it and suggested I make a GUI version. I created this utility in the past, although this is my first release so be gentle. :) GoGrabber's features Capture whole desktop as an image file, and also launch an optical character recognition (OCR) application on the image file. If the OCR

application doesn't work properly, the file can still be saved to the clipboard. A notification bar shows the screenshot is being processed. A number of configuration options are available at the Control Panel. Works on Windows 2000, Windows XP, Vista, and Windows 7. Try it out! Guidance Once GoGrabber is installed, simply double-click the GoGrabber icon in the start menu. GoGrabber will be launched. In the View menu, choose "Window" and select a screenshot mode. In the Image menu, choose a format for the file to be created. At the top
