MiaouIRC [Updated-2022]

MiaouIRC is a server application for running an IRC network using Java API. It supports both client and server mode. Client mode allows the client application to connect to the server network and request a list of available networks and servers. Server mode can have many clients connected. MiaouIRC can run on Windows, Linux, BSD, Solaris, MacOSX, OS/2, Cygwin, and many other unices. MiaouIRC is Free, Open Source software. To use it, you only have to compile it with the "miaou" command line arguments. If you need any help to compile it with the JRE and jdk development tools, please refer to the official documentation at Please note that this version is not fully RFC1459 compliant. The server mode is programmed mainly for GNU/Linux systems. If you would like to have it for your OS, have a look at the "mods" directory. For Win32 users and FreeBSD users, look at the "win32" directory.
