X-muCommander is a portable version of muCommander, an Open Source file manager and organizer. You can explore your disks and networks with the help of graphical explorer and navigation tree views. With the help of search, change directory, fast copy, move, rename, rename folder, more commands, including batch processing, X-muCommander allows you to change the file

system encoding to Unicode when moving files between systems. There is a simple tree-view in the main window, which allows you to see and navigate directories, files, zip archives and other items, the main window of X-muCommander incorporates a toolbar with the standard functionality, but with some additional options. Use the main menu or the right-click menu on the toolbar to configure the applications toolbars,

or to change some visual options. X-muCommander is a fast, unobtrusive, portable and handy product. It is useful for beginners and experts and will certainly meet the requirements of any computer user.

Corrupted CD: System Error 1 In order to play the CD, the application may be configured by the registry to open a specific location in the computer. Please see.

Corrupted CD: System Error 2 Log files are maintained by the

program. In normal operation, these are stored in the X-muCommander folder C:\Users\{USERNAME}\.X-muCommander. They can also be stored in the main subfolder, where they are known as errorlog.txt. It is important to note that each time an error occurs, a new errorlog.txt in the folder C:\Users\{USERNAME}\.X-muCommander is replaced with a new one.

Error Location Error location - If the source is

an ISO file, this error is related to the source. Q: How to "base" in JComboBox I'm trying to create JComboBox to show images, i have my own Image class: public class Image{ private String path; public Image(String p){ this.path = p; } public String getPath(){ return this.path; } } And i have another class ImageCollection which

What's New in the?

What's New in Version

2.01 »Added 3 new features. »You can now import and export folders with the help of AAF files. »You can now easily switch between partitions without reloading the entire file manager. »Also, you can now use X-muCommander with a remote shell on the host computer. »You can now sort files alphabetically. »You can now sort files by size. »You can also now change the default unit for the checkbox "Hide empty directories"

to KB instead of MB.

»The help menu now has a section dedicated to

the X-muCommander

help files. »The help files

now have a section

dedicated to the new X-

muCommander features.

»Adjusted some minor

text and a couple of bug

fixes. »The installer now

requires an active

Internet connection when

you run it. »The installer

has a log file that will

help you to troubleshoot

most of the application's

problems. »This new

version also includes a

clean up project for the X-muCommander file manager GUI. »You can even try it and see if you think it is worth the effort. Great product but please make the date shown for the um's files on the left side when a file is selected and moved by clicking on it change as it will make more sense than using the date when it's displayed. Please as many people probably use this function compared to the date function. Great product

and definitely worth downloading and trying!

What's New in Version 2.02

- » This release contains bug fixes and code improvements for performance.
- » Also, the installer now checks for the Norton Commander help files (COPYING.txt), so you don't need to get the application again.
- » The MSI installer now supports Windows 8.
- » The MSI installer also allows you to manage the downloaded files via a web browser.
- » The installer can even detect

if the files are already installed and then install them again. » This release also includes a clean up project for the X-muCommander file manager GUI. » You can try it and see if you think it is worth the effort. Great product but please make the date shown for the um's files on the left side when a file is selected and moved by clicking on it change as it will make more

System Requirements For X-muCommander:

**MINIMUM: OS: Windows 7
or later CPU: 1.0 GHz
RAM: 1024 MB DirectX:
10.0 Network: Broadband
Internet connection
Sound: Windows Media
Player or similar Drivers:
Latest Vorteksoft driver
for VX19-II, latest
Microsoft DirectX, latest
WMP codec, latest
Microsoft Silverlight
RECOMMENDED: CPU:
1.2 GHz RAM: 2048 MB
DirectX: 10**
